Detailed Action

Response to Amendment

1. Applicant's Remarks/Arguments filed on 3/30/2007 regarding claims 1, 2-21, 23-27 have been fully considered. Claims 2, 22 have been canceled by applicant and claims 1, 2-21, 23-27 are currently pending.
2. Acknowledgement is made of the amended abstract with respect to the objection to the specification set forth in the previous Office action. The corrections are acceptable and the objection to the specification is now withdrawn.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

The present application relates to providing a method and transmission convergence sublayer apparatus for receiving and processing ATM cells at the physical layer, including the unique functions of:

“a write-in buffer controller for writing the descrambled data into the buffer according to the indication provided by the byte pointer when permission to do so is granted by the idle cell identifier and the cell delineation state machine, wherein the transmission convergence circuit further includes a cell counter for responding to conditions requiring the cell delineation state machine to change from a search state into a complete synchronization state and vice versa according to the pointer signal submitted by the byte pointer, and the cell counter acts by first

counting number of received data cells after the state transition and deciding if going into the complete synchronization state or returning to the search state is necessary.”

The closest prior art, Murakami et al. (USP 5,570,368), discloses a method and apparatus for receiving and processing ATM cells, comprising the functions of cell delineation, buffering and idle cell identification. However, Murakami fails to anticipate or render obvious the above quoted limitations of the present application. This renders the claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
